

Trend Micro AntiVirus 2007 plus AntiSpyware

Powerful, proven protection against viruses and spyware. *Protection against malicious threats.*

Millions of people already rely on Trend Micro to safeguard their computers, personal files and privacy. Trend Micro AntiVirus plus AntiSpyware offers essential protection needed against viruses, worms, Trojan horse programs, and spyware. Share files with confidence, knowing your computer is secure.

Trend Micro AntiVirus plus AntiSpyware installs quickly and then works quietly in the background. Its unobtrusive monitoring system, prescheduled security scans, and automatic downloads of the latest security updates. You can concentrate on the things you really want to do with your computer.

New and Improved Features

AntiVirus Security

Award winning anti-virus engine protects against viruses, worms, Trojan horse programs, and more.

Spyware Protection

Powerful anti-spyware technology guards your information and privacy against spyware, rootkits and other malware.

System Scans

Scan when it's convenient, either with a standard scheduled scan, or with a customized scan, on-demand.

Real-time Monitoring

Real-time monitoring automatically scans attachments in your incoming and outgoing emails, alerting you only if AntiVirus finds a problem.

Deleted File Recovery

Helps you recover any quarantined files, which you may have deleted accidentally.

Automatic Updates and Outbreak Alerts

Provides ongoing protection against the newest virus outbreaks for the full AntiVirus subscription period.

Product Support

FREE web, email and chat support, with your annual product subscription.

Access the powerful, ongoing protection of Trend Micro AntiVirus through a simple, easy-to-use interface.

About Trend Micro

Trend Micro Incorporated is a pioneer in secure content and threat management. Founded in 1988, Trend Micro provides individuals and organizations of all sizes with award-winning security software, hardware and services. With headquarters in Tokyo and operations in more than 30 countries, Trend Micro solutions are sold through corporate and value-added resellers and service providers worldwide. For additional information and evaluation copies of Trend Micro products and services, visit our Web site at www.trendmicro-consumer.com.

Protect your computer from infection

Trend Micro AntiVirus plus AntiSpyware detects and removes viruses from all types of files, no matter if you received them in your email, downloaded them from the Internet, installed them from removable media or already stored them on your hard drive. Automatic updates systematically provide ongoing protection against the newest virus outbreaks.

Secure your privacy

Online Web sites sometimes embed tracking systems in software offered through the Internet. These invisible agents can monitor and report your online habits, or even specific keystrokes, without your knowledge or permission, making you the target of unwanted promotions. Trend Micro AntiVirus plus AntiSpyware blocks and removes these forms of adware, as well as malicious spyware that can allow others to take control of your computer.

Customize your security

Trend Micro AntiVirus plus AntiSpyware allows you to configure the protection you want. Customize the prescheduled scans, set up new ones, and then change the routine whenever you like. Trend Micro AntiVirus plus AntiSpyware handles most threats automatically, issuing alerts only when problems are found. You decide which files to delete. If you delete a file in error, Trend Micro AntiVirus plus AntiSpyware offers you a way to recover it.

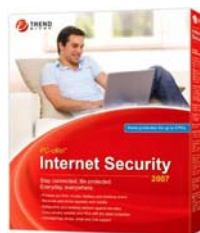

From the Virus and Spyware controls menu, the AntiVirus and Spyware controls can be turned on or off, as required.

If you are looking for even more complete protection, upgrade to Trend Micro's security suite.
