

Worry-Free™ Security Solutions: Client Server Security for Small and Medium Business

Integrated Protection from Spyware and Malware

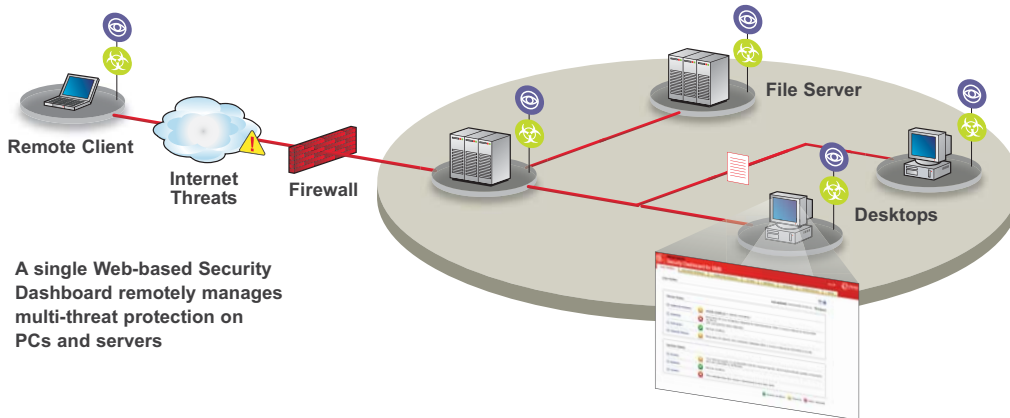

Worry-Free Security Solutions are certified for Windows® Vista™ and consist of Client Server Messaging Security for SMB, and Client Server Security for SMB. They automatically protect PCs and laptops, mail servers, and file servers against a broad range of Internet threats, 24/7.

Client Server Security for Small and Medium Business helps:

- Protect confidential data from theft or modification
- Preserve availability of computers and networks for work, not threats
- Prevent spyware from distracting or harming employees

When tested against competitors¹, a similar Worry-Free centrally managed “set and forget” solution requires less time and effort to deploy to PCs, and Microsoft™ Windows™ servers.

A single Web-based Security Dashboard remotely manages multi-threat protection on PCs and servers

SOFTWARE

Protection Location

- PCs / laptops
- Microsoft™ Windows™ Servers

Threat Protection

- Anti-Spyware
- Antivirus

*“Trend Micro’s automatic threat prevention, protection and remediation capabilities were extremely effective and required **zero user intervention**.”*

— West Coast Labs
Evaluating Client Server SMB Solutions, May 2006
